Lab 2

Input Output

3 Question input & Output

- Write a simple program that prompts the user for their name and 2 other questions then prints a personalized message using `std::cin` and `std::cout`.
- Experiment with `std::cout` to print different messages and use `std::endl` and `\n` for new lines.
- Swap - Introduce intentional errors (e.g., missing semicolons) and practice debugging by reading compiler error messages.
- (Optional) Add single-line and multi-line comments to your code.

Example

- What's your name
- What's your year in college
- What's your favorite scary movie

Output:

Hi my name is Jeff, I am a Junior at LAGCC and my favorite scary movie is Tales from the Hood
